

FM.120 General purpose industrial crayon

Markal® FM.120 is a wax-based marking crayon that works in all weather conditions. The marks are weather and fade-resistant for long-lasting visibility.

- Marks on rough surfaces, such as concrete, wood, steel, and cardboard
- Formulated for weather and fade-resistant marking on indoor and outdoor surfaces
- Available in 6 bright colours for instant identification
- Marking range: -20°C to 50°C

DURA-INK® 15 Permanent ink marker with fine bullet tip

Ideal for layout work and parts identification, the DURA-INK® 15 permanent ink marker has a fine bullet tip for precise marking. The wear-resistant, fast-drying ink and durable tip and barrel makes this marker ideal for industrial environments.

- Industrial-strength ink is smear- and water-resistant for longer lasting marks
- Built-in clip-cap stores conveniently on back and prevents marker from rolling off work surfaces
- Durable plastic barrel reduces breakage on the jobsite or in-plant
- Mark Size: 1,5 mm

In addition to our range of high performance markers, INDASOL also offer a complete range of Technical Tapes, Adhesives and Protection Tapes for applications such as:

- High Temperature Masking
- Temporary Transit Protection
- Permanent Surface Protection
- High Performance Bonding
- Structural Bonding and Sealing

Manufactured and controlled to ISO 9001, we can convert technical tapes and protection tapes to your desired widths and length. We can also offer our adhesives in bespoke setting times and a range of RAL colours.

Almost all of our products are available on a next working day delivery from either ourselves or from one of our many specialist supply partners.

Please let us know your requirements and we would be happy to advise you on the best product for your application.

MARKAL® SL.100 Liquid paint marker for general marking

SL.100 is a xylene-free, low-odor fast-drying liquid paint marker that provides long-lasting marks for almost any surface. The 15 opaque, bright colours are weather and UV-resistant for excellent mark identification.

- 15 colours for excellent mark identification, quality control, and parts inspection
- Fast-drying, indelible permanent paint for immediate handling reduces work downtime
- Xylene-free paint reduces user health risks
- Strong medium bullet tip resists wear to provide long marking life
- Marking range: -20°C to 50°C
- Mark temperature resistance: up to 100°C

MARKAL® STYLMARK Ball tube marker for multiple surfaces

Markal® Stylmark® is a metal-ball tip marker for marking most surfaces. The aluminum squeeze tube and thick paint makes it suitable for rough, vertical and overhead surfaces with excellent adhesion on oily and wet surfaces. Xylene-free paint reduces user health risks.

- Durable steel ball tip marks with indelible paint on smooth or rough surfaces
- Steel ball tip is resistant to very rough surfaces for long marking life
- Offered in 2 sizes: 3 mm and 6 mm for varied mark thickness
- 11 bold, bright paint colours are weather, water, and UV-resistant
- Unique paint designed to not drip on vertical or overhead surfaces
- Marking range: -20°C to 70°C
- Mark temperature resistance: 200°C

MARKAL® SL.130 Removable liquid paint marker for temporary marking

SL.130 is a crayon-based liquid paint that easily wipes away with water from any smooth, non-porous surface without leaving a ghost trace or residue once the mark is removed.

- Marks can be easily wiped away with water without leaving a ghost trace or a mark residue
- 9 bright colours including 4 fluos are excellent for temporary mark identification, quality control, and parts inspection
- Medium bullet tip resists wear to provide long marking life
- Valve-actuated tip releases paint on-demand for smooth, continuous use
- Marking Range: +5°C to 40°C
- Mark temperature resistance: 80°C
