

# EPDM PRIMER

## TECHNICAL DATA SHEET

- Fast, Easy Application • Quick Drying • Low Odour
- Uniform Spray Pattern

### DESCRIPTION:

Tuskbond EPDM Primer is a quick and easy solution designed to increase the adhesion potential of EPDM and other roofing membranes. Offering a fast and easy alternative to standard roll on primers, Tuskbond EPDM primer will increase the speed, quality and precision of a contractor's work. The primer is quick drying, ready to work on within minutes and each 22L canister will cover an area of 250m<sup>2</sup> (based off a 10g/m<sup>2</sup> dry coat weight) reducing both working time and overall cost.

### TECHNICAL SPECIFICATION:

PROPERTY	TUSKBOND EPDM PRIMER	
Solvent	Hydrocarbon, Acetone	
Propellant	Hydrocarbon	
Solids Content (approx).	30%	
Spray Pattern	Web	
Colour	Black	
Coverage (approx).	22L	250m <sup>2</sup>
	14L	160m <sup>2</sup>
VOC	575g/l	
Available Sizes	22L, 14L	

### STORAGE & SHELF LIFE:

Protect from extremes of temperature in a controlled environment between 15 and 35°C, and away from direct sunlight. Do not stand on a cold concrete floor. Low temperatures can result in irreparable separation of the adhesive. If the product sprays like a jet, the canister is too cold. Warm to at least 10°C before using. **DO NOT ALLOW THE PRODUCT TO FREEZE.** Stored under the correct conditions, in original, unopened containers, the product will have a shelf life of 12 months.

### TECHNICAL DATA SHEET

#### DIRECTIONS FOR USE:

- For best results the substrate and product should be used at temperatures between 15°C and 25°C.
- Connect a suitable spray tip, such as a Unijet 9501 to the end of the spray gun. Then connect the gun to the hose.
- Connect the hose and gun assembly to the canister and tighten the connections. Turn on the canister valve, if there are any leaks, tighten the connection at the source of the leak.
- The valve should remain open until the canister is used up. Use the locking nut on the gun after use. Turning off the valve will result in the product drying in the hose and gun causing blockages.
- Hold the spray gun 10-20cm and apply a uniform coat of primer, covering the entire surface.
- Allow time for the solvents to evaporate from the material, the primer should feel dry to the touch before being worked with. Dependant on ambient temperature this can take from 2 to 10 minutes.
- Once the primer is dried, it is ready to be worked on. Avoid contaminating the primed area with dust, as much as possible, as this will impair performance.
- To prolong the life of your equipment consider a Tuskbond GC22 canister gun and hose cleaning kit.

**IMPORTANT:** This product is not compatible with bituminous membranes or flexible PVC.
