

# F26

GP NON MECL  
FOAM ADHESIVE

SUITABLE FOR:

Plywood

Thin Fabric

Foam

MDF

PROPERTIES:

Web Spray

AVAILABLE IN:

22ltr Canister

COLOURS:

Clear

# TECHDATA

## PRODUCT DESCRIPTION

TensorGrip® F26 is a non-MECL formulation bringing exposure reduction benefits to users along with a highly controllable spray pattern. F26 will bond a variety of foam and fabrics to plywood and MDF substrates.

## ADVANTAGES

- Non-MECL
- Up to 80°C temperature resistant
- Highly Controllable spray pattern
- High green strength
- Good level of tack

## DIRECTIONS FOR USE

- This product is designed to be applied to two surfaces to be bonded together. Make sure that surfaces are clean, dry and free from dirt, dust, oil, loose paint, wax or grease, etc. For best results, the temperature of the adhesive and the surfaces being bonded should be between 60 °F - 80 °F (16 °C - 27 °C).
- We recommend shaking the aerosol can well before using.
- Prior to use, Check compatibility by spraying a small test patch of the adhesive on the substrate. This product may degrade some substrates. Spray about 5 - 10 cm (2" - 4") away at a 90° angle to the surface, applying a uniform, even coat of adhesive to obtain 80% to 100% coverage of the surface. If necessary, spray another coat of adhesive in areas that appear to need more adhesive. Spray both surfaces to be bonded, one surface vertically and the other surface horizontally. Allow the adhesive to tack off until no adhesive transfers to the knuckle when touched.
- Adhere surfaces and press together with adequate pressure. A roller or a mallet is recommended to apply a uniform pressure to achieve maximum strength. Allow 24 hours for the adhesive to fully cure.

## SPECIAL PRECAUTIONS

- For optimum results store canister above 18°C during use, but must always be above 10°C. Allow substrates to acclimatise to normal room temperature (18°C) for 48 hours before bonding. Do not exceed open time of the adhesive. Keep canister off cold concrete floors during use. If adhesive is expelled wet or as a jet, aerosol is too cold – move to warm environment and allow to thoroughly acclimatise before reusing.
- MSDS and Technical Data Sheets
- MUST be read and understood before use. Information contained in this technical literature is believed to be accurate and offered in good faith for the benefit of the consumer. The company however cannot assume any liability or risk involved in the use of its chemical products since the conditions of use are beyond our control. Statements concerning the possible use of our products are not intended as recommendations to infringe on any patent.

GP NON MECL  
FOAM ADHESIVE

## CAUTION

- Use only in well ventilated areas.
- DO NOT thin or reactivate with solvents.
- DO NOT incinerate.
- DO NOT expose to extreme heat > 50°C.
- Keep away from sources of ignition.
- Test for suitability before use.

## CHEMICAL TECHNICAL DATA

### TYPICAL PROPERTIES

Viscosity	350 cps 25°C sp#2, 30r.p.m.
Total Solids	28%
Colour	Clear
System Flammability	Non-flammable adhesive asnd Non-flammable propellant
Dry time	1-2 mins dependant on temp & humidity
Open time	60 mins
SHELF LIFE	12 months from date of manufacture

### PACKAGING

500 ml	Aerosol suitable for industrial and general public use
22 ltr	Disposable canister suitable for industrial use only
110 ltr	Returnable canister suitable for industrial use only

## STORAGE

### HANDLING & STORAGE

- Consult Material Safety Data Sheet prior to use.
- Do not store at temperatures over 50°C.
- Avoid exposure to direct sunlight.
- Do not store directly on concrete floor.
- For optimum performance, store at 18°C during use, but must always be above 10°C.
- When connected, keep valve open and hose pressurised at all times.
- Do not close valve until ready to connect to new cylinder.
- Release pressure in hose before disconnection.
- Always test the adhesive to determine suitability for your application prior to use in production.
