DIRECTIONS FOR USE:

- Ensure all surfaces are dry and free from any contaminants that may impair the bond.

All cements, concretes and bare metal

- surfaces should be primed prior to application of the silicone. Timber should be primed and painted.

- Cut off the tip of the cartridge, taking care not to damage the thread.

Apply the nozzle to the end of the cartridge and cut the tip at a 45° angle with an opening slightly larger than the joint to be sealed.

- After applying the silicone, tool the joint using a plastic spatula wetted with soapy water.

- Although wetting immediately after application will not have any adverse effects, do not apply onto wet surfaces.

- Tools can be cleaned using white spirit. Do not use on surfaces where water can penetrate through porous materials to bond interface without first carrying out remedial work.

- Not suitable for fixing mirrors or sealing natural marble. Not suitable for use on bitumen or asphalt.
