

Type 1 family for strength:
Slide & click engagement for
heavy wall or ceiling panels
or loads such as shelves

Type 2 family for easy access:
Push & click engagement
and 90° connection, ideal for
concealing services

Type 3 family for simplicity:
Push & click connectors for many
different materials, including
upholstered and acoustic panels

button-fix

Hidden fixings, visible impact

Panelling walls or ceilings, assembling
furniture and reliably hanging many
other interior fittings — with **no**
unsightly visible screws

2024

Removable & Interchangeable

Unlike panels fixed with adhesives, ones mounted on Button-fix can be removed in a matter of seconds, to gain access to pipework and services, for repair, recycling or updating to the latest design.

Strong & Secure

Whether you're hanging shelf units or ceiling panels, or need a demountable fastener that can withstand the extremes of maritime and other transport applications, there's a Button-fix for you.

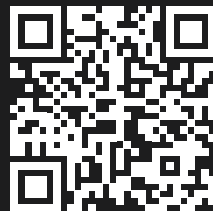

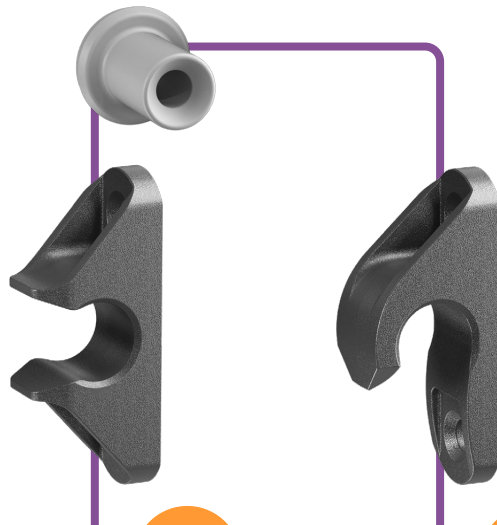

Designed with the installer in mind

Our helpful Marker accessories quickly and accurately align the Button-fix installation, without any need to measure (or have X-ray vision).
